- () RECORDED AS PER LEASE DESCRIPTION

SURVEYOR'S NOTE:

There are two lease land description calls that create two interpretations in regards to lease lines. One, is "thence southeasterly along the said line of right-of-way 307.00 feet to the point of beginning and two, " thence easterly along said boundary line (southerly line of railroad right-of-way) 318.00 feet to the point of beginning. Based on the common width of 225.00 feet in both descriptions and the location of the existing chain link fence in regards to the 307.00 feet description call, it is Bixby Land Surveying Inc opinion that the above noted references are the best available evidence for determining the above shown lease lines.
