"BEARING ORIENTATION AND GRID CONVERSION"
 Right of Way Plat Bearings are oriented to the Wisconsin Coordinate System with 0 degrees 0 minutes 0 seconds being "GRID NORTH".
 The difference between project plat bearings represent plane angles and ground angles and is given in the second R/W plat.
 Distances are given in ground unless otherwise noted and may be converted to ground lengths by multiplying them by 1.0000697.

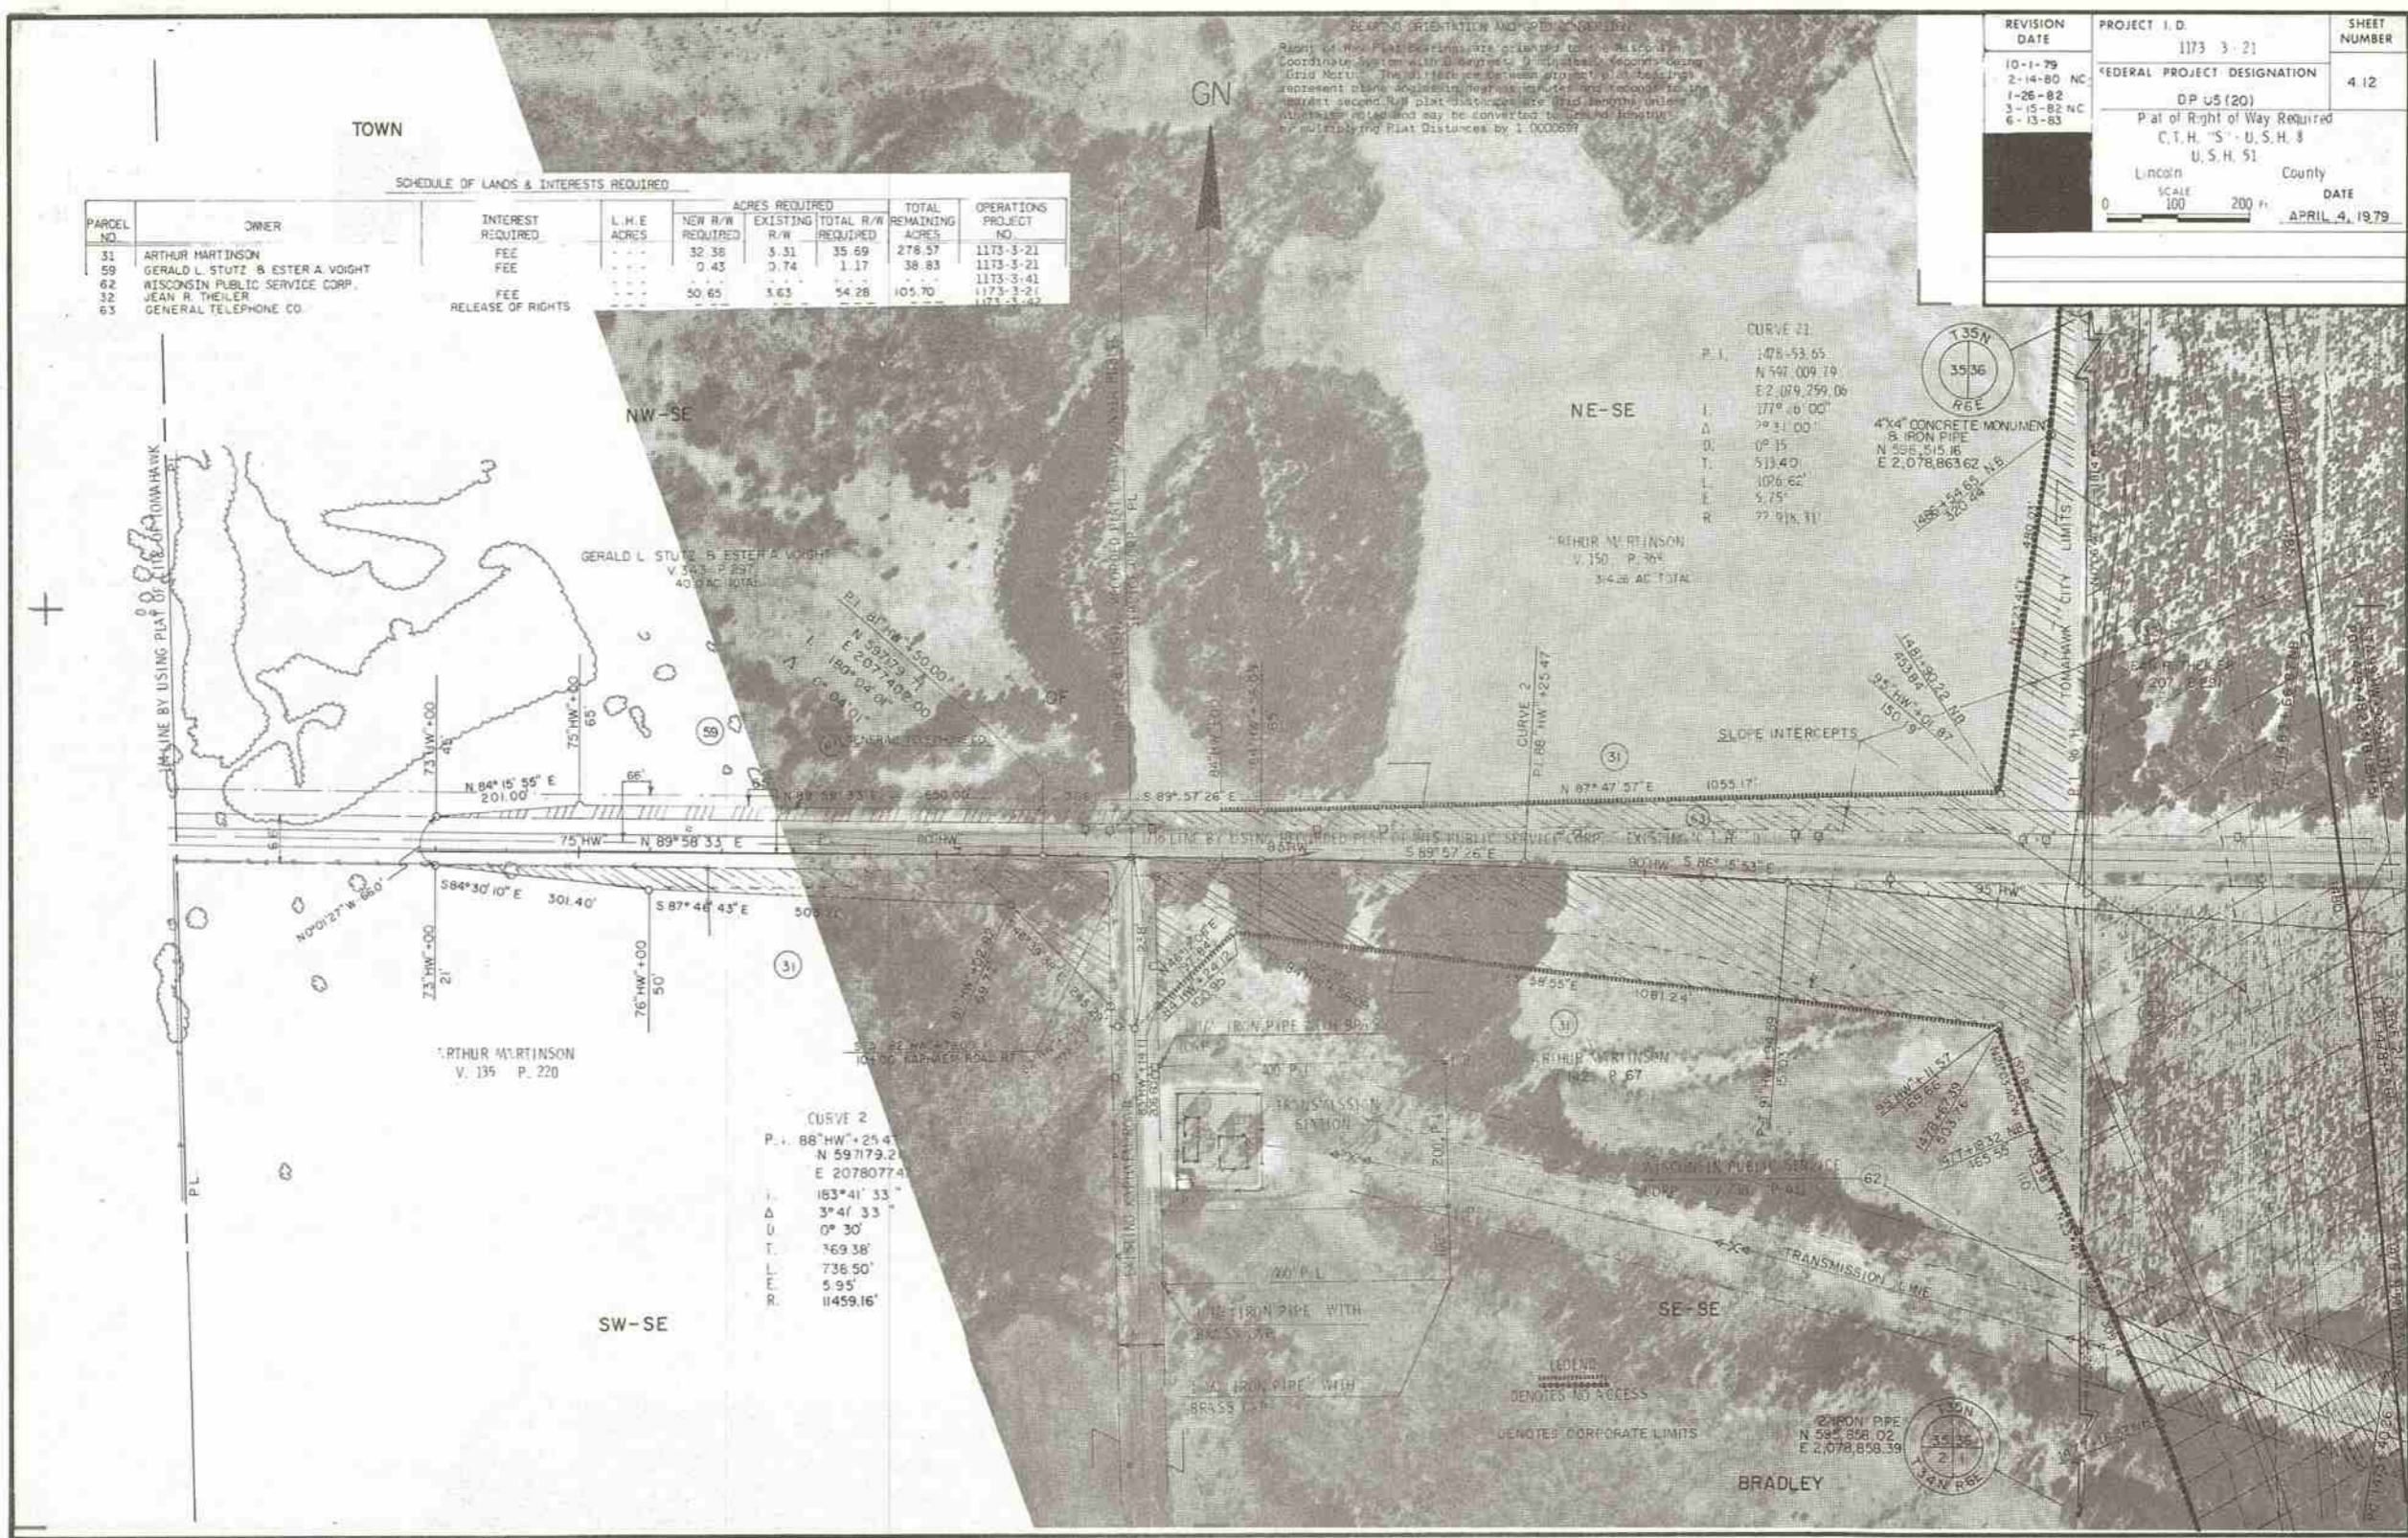

BRADLEY

BEARING ORIENTATION AND SPACING
 Basis of this Plat bearing are obtained from a National
 Coordinate System with 0 bearing 0' and 100' spacing being
 Grid North. The distance between adjacent plat bearings
 represent plane angles in degrees, minutes and seconds for the
 adjacent second R/W plat distances are Grid North, unless
 otherwise indicated may be converted to bearing lengths
 by multiplying Plat Distances by 1.000009

"BEARING ORIENTATION AND GRID CONVERSION"
 Right of Way Plat Bearings are oriented to the Wisconsin
 Coordinate System with D degrees, 0 minutes, 0 seconds bearing
 "GRID NORTH". The difference between project plat bearing
 resultant plumb angles in degrees, minutes and seconds (D, M, S)
 amount seconds on plat, distances are Grid bearings used for
 adjustment and conversion to Wisconsin coordinates by
 multiplying Plat distances by 1.0000697.

BEARING ORIENTATION AND GRID CONVERSION
 Right of Way Plat Bearings are oriented to the Wisconsin Coordinate System with a magnetic declination of approximately 10°30' NORTH. The distances between adjacent plat bearings are measured along the ground surface and are subject to the usual surveying conditions. R/W Plat distances are field lengths unless otherwise noted and may be converted to ground lengths by multiplying plat distances by 1.000029.

NOTE: Bearings and Distances from Recorded Documents are identified by being enclosed in parentheses.
