Walkowski S-2717 visited this corner and found a Survey Marker Nail ±12 feet North of the centerline of S.T.H. "64" from a previous survey by Becher and Hoppe. The Nail fits fence line to the South and seemed to be set by single proportionate measurement. Held this location as the best available evidence of the corner location and set witness monuments to perpetuate the position. 9/15/2014 - I visited the corner location prior to the resurfacing of Highway "64" and recovered the survey marker nail of record. Also recovered all four (4) witness monuments from the previous corner restoration form. Distances checked well. Set four (4) Berntsen SSDR-130 witness monuments and returned after construction to set a Berntsen SNM-1 Nail at the corner location. CERTIFIED CORRECT: CHRISTOPHER L.
